FIGURE 2-4 Washing hands and removing jewelry are two important safety habits all service technicians should practice.

FIGURE 2-5 Typical fireproof flammable storage cabinet.

FIGURE 2-6 Using a water-based cleaning system helps reduce the hazards from using strong chemicals.

FIGURE 2-7 Used antifreeze coolant should be kept separate and stored in a leakproof container until it can be recycled or disposed of according to federal, state, and local laws. Note that the storage barrel is placed inside another container to catch any coolant that may spill out of the inside barrel.

FIGURE 2-11 The Environmental Protection Agency (EPA) Hazardous Materials Identification Guide is a standardized listing of the hazards and the protective equipment needed.

Hazardous Materials Identification Guide (HMIG)

HAZARD CLASSIFICATION	HAZARD	PROTECTIVE EQUIPMENT
1	HEALTH	4 - Clothing
2	FLAMMABILITY	5 - Breathing
3	REACTIVITY	6 - Handwear
4	PROTECTIVE EQUIPMENT	7 - Eyes
		8 - Footwear

HAZARD	PROTECTIVE EQUIPMENT	HAZARD	PROTECTIVE EQUIPMENT
1 - Ignitability	1 - Eye Protection	1 - Corrosive	1 - Eye Protection
2 - Flammable	2 - Eye Protection	2 - Irritant	2 - Eye Protection
3 - Oxidizing	3 - Eye Protection	3 - Harmful	3 - Eye Protection
4 - Explosive	4 - Eye Protection	4 - Very Irritant	4 - Eye Protection
5 - Organic Peroxide	5 - Eye Protection	5 - Toxic	5 - Eye Protection
6 - Poisonous	6 - Eye Protection	6 - Very Toxic	6 - Eye Protection
7 - Radioactive	7 - Eye Protection	7 - Extremely Toxic	7 - Eye Protection
8 - Infectious	8 - Eye Protection	8 - Corrosive	8 - Eye Protection
9 - Environment	9 - Eye Protection	9 - Flammable	9 - Eye Protection

Protective Equipment	HAZARD	PROTECTIVE EQUIPMENT
A - Goggles	1 - Eye Protection	1 - Eye Protection
B - Goggles	2 - Eye Protection	2 - Eye Protection
C - Goggles	3 - Eye Protection	3 - Eye Protection
D - Goggles	4 - Eye Protection	4 - Eye Protection
