ACROSS

- 1 Check service information to determine the _____ of the unit based on VIN, RPO code, or pan shape.
- 4 The presence of _____ in the pan of an automatic transmission/transaxle does not necessarily mean that a part(s) has failed or needs to be replaced.
- 7 The "add" mark on most automatic transmission _____ indicates the level is down 0.5 quart (0.5 liter).
- 9 If the _____ does not apply, a drop in fuel economy of 3 to 4 miles per gallon is commonly reported.
- 10 Be sure that the ATF is at _____.

DOWN

- 2 Some _____ are equipped with a side pan that either may or may not be needed to be removed when servicing the assembly.
- 3 To perform a _____, with your left foot firmly applied to the brake pedal, move the shift selector in the drive position and depress the accelerator pedal to the floor.
- 5 Checking the stall speed in _____ is just a double check.
- 6 The first step in _____ any problem is to test drive the vehicle and verify the customer complaint.
- 8 Do not use _____ designed for use in coolant or air-conditioning systems or severe harm can occur to the automatic transmission/transaxle.
