## Chapter 14 Electric Power Steering

### Opening Your Class

KEY ELEMENT	EXAMPLES
Introduce Content	This course or class covers operation and service of <b>Automotive Steering and Suspension Systems with Wheel Alignment and Drive Axles</b> . It correlates material to task lists specified by ASE and NATEF
Motivate Learners	Explain how the knowledge of how something works translates into the ability to use that knowledge to figure why the engine does not work correctly and how this saves diagnosis time, which translates into more money.
State the learning objectives for the chapter or course you are about to cover and explain this is what they should be able to do as a result of attending this session or class.	<p>Explain learning objectives to students as listed below:</p> <ol style="list-style-type: none"> <li>1. Describe the purpose and function of electric power steering system.</li> <li>2. Discuss the various types of electric power steering systems.</li> <li>3. Explain how electric power steering systems operate.</li> <li>4. Discuss how to diagnose system faults.</li> <li>5. Explain service procedures for electric power steering systems.</li> </ol> <p style="color: blue;"><b>This chapter will help prepare for ASE Suspension and Steering (A4) certification test content area "A" (Steering System Diagnosis and Repair).</b></p>
Establish the Mood or Climate	Provide a <b>WELCOME</b> , Avoid put downs and bad jokes.
Complete Essentials	Restrooms, breaks, registration, tests, etc.
Clarify and Establish Knowledge Base	Do a round robin of the class by going around the room and having each student give their backgrounds, years of experience, family, hobbies, career goals, or anything they want to share.
