

# EVAP System Scan Tool Testing

**Meets NATEF Task:** (A8-E-5) [P-2], (A8-E-10) [P-1] Diagnose emissions and driveability concerns caused by the evaporative emissions control system; perform necessary action.

Name \_\_\_\_\_ Date \_\_\_\_\_ Time on Task \_\_\_\_\_

Make/Model/Year \_\_\_\_\_ VIN \_\_\_\_\_ Evaluation: 4 3 2 1

\_\_\_\_\_ 1. Check service information for the recommended checks and test procedures to follow when diagnosing the EVAP system using a scan tool.

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_ 2. List the solenoids that can be commanded on or off using a scan tool. (Note: The factory scan tool or an enhanced version of an aftermarket scan tool may be necessary to provide bi-directional control of the components in the EVAP system.)

Component	Command ON/Off?
_____	_____
_____	_____
_____	_____
_____	_____

\_\_\_\_\_ 3. Using the scan tool, what EVAP-related data (PID) is displayed?

PID	Value Displayed
_____	_____
_____	_____
_____	_____
_____	_____

\_\_\_\_\_ 4. Based on the test results using a scan tool, what is the necessary action? \_\_\_\_\_
