

Traction Control Identification

Meets NATEF Task: (A5-G-9) Identify traction/vehicle stability control system components.
(P-3)

Name _____ Date _____ Time on Task _____

Make/Model/Year _____ VIN _____ Evaluation: 4 3 2 1

_____ 1. Check service information for what type and components are used in the traction control/vehicle stability control system (check all that apply).

- _____ A. Rear-wheel only antilock braking system
- _____ B. A four-wheel (three channel, three wheel speed sensors) ABS
- _____ C. Four-wheel (four channel, four wheel speed sensors) ABS
- _____ D. Electronic throttle control (ETC) system
- _____ E. Electronic stability control dash-mounted switch
- _____ F. Electric power steering system (EPS)

_____ 2. Describe the location of the following components:

Antilock braking system hydraulic control unit _____

Antilock braking system electronic control unit _____

Wheel speed sensors _____

Stability control system dash switch (if equipped) _____
