

Exhaust Manifold Identification

Meets NATEF Task: Not specified by NATEF

Name _____ Date _____ Time on Task _____

Make/Model/Year _____ VIN _____ Evaluation: 4 3 2 1

_____ 1. Number of exhaust manifolds on the engine?

- _____ one
- _____ two

_____ 2. Type of material used?

- _____ cast iron
 - _____ steel (header-type manifold)
 - _____ other (describe)
- _____

_____ 3. Exhaust manifold(s) laminated (two pieces sandwiched together)?

Yes _____ No _____

_____ 4. Is there a gasket used between the exhaust manifold and the cylinder head from the factory?

Yes _____ No _____

_____ 5. What type of fasteners are used to hold the exhaust manifold to the cylinder head?

- _____ bolts
- _____ nuts (uses studs in the head)

_____ 6. What is the torque specification for the fasteners?

_____ 7. Carefully inspect the exhaust manifold for cracks or damage.

OK _____ NOT OK _____
