

Catalytic Converter Rattle Test

Meets NATEF Task: (A8-E-9) Inspect and test catalytic converter efficiency. (P-1)

Name _____ Date _____ Time on Task _____

Make/Model/Year _____ VIN _____ Evaluation: 4 3 2 1

- _____ 1. Safely hoist the vehicle.

- _____ 2. Using your fist or a small rubber mallet, lightly tap on the catalytic converter. If the converter rattles, it is broken internally and requires replacement.

NOTE: If the catalytic converter has broken substrate, the muffler may also require replacement.

- _____ 3. Based on the results of this test, what is the necessary action? _____
-
