

Gasoline Reid Vapor Pressure

Meets NATEF Task: (A8-D-2) Check fuel for contaminants and quality; determine necessary action. (P-2)

Name _____ Date _____ Time on Task _____

Make/Model/Year _____ VIN _____ Evaluation: 4 3 2 1

____ 1. Check service information for the recommended Reid vapor pressure (RVP) of the gasoline to be used.

What is the RVP recommended?

_____ Summer grade _____

_____ Winter grade _____

_____ Not available

____ 2. Using the standardized test procedure to determine the vapor pressure of fuel at 100°F, what is the RVP?

____ 3. Based on the factory specifications and test results, what is the necessary action?
