## Chapter 1 Service Information, Tools, & Safety

### Opening Your Class

KEY ELEMENT	EXAMPLES
Introduce Content	This course or class covers operation and service of <b>Automotive Brakes</b> . It correlates material to task lists specified by ASE and NATEF.
Motivate Learners	Explain how the knowledge of how something works translates into the ability to use that knowledge to figure why the engine does not work correctly and how this saves diagnosis time, which translates into more money.
State the learning objectives for the chapter or course you are about to cover and explain this is what they should be able to do as a result of attending this session or class.	Explain the chapter learning objectives to the students. <ol style="list-style-type: none"><li>1. Understand the ASE knowledge content for vehicle identification and the proper use of tools and shop equipment.</li><li>2. Retrieve vehicle service information.</li><li>3. Identify the strength ratings of threaded fasteners.</li><li>4. Describe how to safely hoist a vehicle.</li><li>5. Discuss how to safely use hand tools.</li><li>6. Identify the personal protective equipment (PPE) that all service technicians should wear.</li><li>7. Describe what tool is the best to use for each job.</li><li>8. Explain the difference between the brand name (trade name) and the proper name for tools.</li><li>9. Explain how to maintain hand tools.</li><li>10. Explain HEV Safety.</li></ol>
Establish the Mood or Climate	Provide a <i>WELCOME</i> , Avoid put downs and bad jokes.
Complete Essentials	Restrooms, breaks, registration, tests, etc.
Clarify and Establish Knowledge Base	Do a round robin of the class by going around the room and having each student give their backgrounds, years of experience, family, hobbies, career goals, or anything they want to share.

5. **SLIDE 5 EXPLAIN FIGURE 1.5** Electronic service information is available from aftermarket sources such as ALLDATA and Mitchell On Demand, as well as on websites hosted by vehicle manufacturers.
6. **SLIDE 6 EXPLAIN FIGURE 1.6** Technical service bulletins (TSBs) are issued by vehicle manufacturers when a fault occurs that affects many vehicles with the same problem. The TSB then provides the fix for the problem including any parts needed and detailed instructions.

**DISCUSSION: ASK STUDENTS TO REVIEW SAMPLES OF VEHICLE OWNER'S MANUALS. ASK STUDENTS TO SPECULATE ABOUT WHY SO FEW OWNERS READ THESE MANUALS**

**HOST DISCUSSION: SERVICE HISTORY**

**We all have our own service history, as documented in our medical records. How do physicians use medical histories to help patients? How is this similar to an automotive technician diagnosing a problem with an automobile? Use this analogy as basis for class discussion. Use one column on flip chart to show elements of medical history. Use another column for corresponding elements of an automotive service history.**
