

Parking Brake Adjustment

Meets NATEF Task: (A5-F-3) Check parking brake cables and components for wear and clean, lubricate, adjust or replace as necessary (P-2)

Name	Date	Time on Task
Make/Model/Year	VIN	Evaluation: 4 3 2
1. Check the service inf	formation for the specified p	arking brake adjustment for the
vehicle being service	d	
2. Apply the parking bra	ake and count the number of	f "clicks."
the parking brake	cks" :licks"	more than 10 "clicks", adjustment of parking brake.
4. Hoist the vehicle safe		
	wheels (front wheels on som	ne Subaru vehicles).
rotates free	eely does not r	rotate
		loosening the parking brake cable.
6. If the rear wheels rota	ate freely and the parking br	rake requires more than 10 "clicks,"
remove the rear brake	es for inspection.	
NOTE: The par	king brake should only be a	djusted after checking and adjusting
the rear brakes.		
7. Clean and adjust the r	rear brakes.	
8. Reassemble the rear b	brakes and apply the parking	g brake 3 - 4 "clicks."
9. If the rear wheels can	be rotated, adjust the parking	ng
brake adjuster until th	ne rear wheel brakes are just	
touching the brake dr	ums.	
10. Apply the parking bra	ake and again count the	
"clicks." Most vehic	le manufacturers recommen	id 🗍 🏹
that the parking brake	e should hold with 6 to 18	
"clicks." Readjust the	e parking brake as necessar	y. / 🤫 🔪
