

Verify Oil Pressure and Temperature

Meets ASE Task: (A9-D-1) Verify engine oil pressure and check operation of the oil temperature sensor.

Name _____ Date _____ Time on Task _____

Make/Model/Year _____ VIN _____ Evaluation: 4 3 2 1

_____ 1. Check service information and determine the following information:

Describe the location of the oil pressure sensor/switch. _____

Describe the location of the oil temperature sensor. _____

_____ 2. Using a scan tool, determine the oil temperature data. _____

_____ 3. Measure the engine oil pressure using a mechanical gauge and compare it to the factory specification.

Measure the oil pressure @ idle = _____

Factory oil pressure specification = _____

___ OK ___ NOT OK

_____ 4. Check the dash display of oil pressure and compare it to the measured value.

___ OK ___ NOT OK
