

Wheels: It looks like you need to look for two things when purchasing engine oil:

1. The correct viscosity (SAE rating)
2. The specified API rating (SM for gasoline engines and CF-4 for diesel engines)

Is this all?

Halderman: No. The International Lubricant Standardization and Approval Committee (ILSAC) standard was established to help make it easier for the customer to identify oil suitable for use in most gasoline-fueled vehicles. The current rating is GF-4 (gasoline-fueled) and includes a starburst on the front of the oil container. This starburst makes it easy to identify engine oil that is suitable for use in gasoline-powered vehicles. Therefore, for most, but not all vehicles, look for three things:

1. The specified viscosity
2. The specific API rating
3. The ILSAC starburst on the front of the container

Next week there are more specifications that must be checked. In the meantime, check the owner's manual for the specified oil to use in your vehicle.

Quaker State's formulation can:

- Improve engine performance
- Resist thermal breakdown
- Protect against harmful deposits

And Quaker State® guarantees engine performance with a 10-year/250,000 mile limited warranty, even if you change your own oil. Visit www.quakerstate.com for details.

Quaker State®. The Power to Reduce Friction™. For additional consumer information: 1-800-237-8645.

La formulación de Quaker State puede:

- Mejorar el desempeño del motor
- Resistir el deterioro termal
- Proteger contra la acumulación de depósitos dañinos

Quaker State® certifica el desempeño del motor con una garantía limitada de 10 años/250,000 millas, aunque usted mismo cambie el aceite. Visítenos en www.quakerstate.com para más detalles.

Quaker State®. Adrenalina Pura. Para información al consumidor adicional: 1-800-237-8645.

Meets or exceeds requirements of ILSAC GF-4, GF-3, API SM and previous API standards.
