

High-Voltage Circuits Identification

Meets ASE Task: (A6-B-7) Identify high-voltage circuits of electric or hybrid vehicles.
(P-3)

Name _____ Date _____ Time on Task _____

Make/Model/Year _____ VIN _____ Evaluation: 4 3 2 1

____ 1. Look for orange conduit and connections. This color indicates high voltage that could be fatal if touched. Describe the location of all orange-colored wires:

- a. _____
- b. _____
- c. _____
- d. _____
- e. _____

____ 2. Most vehicle manufacturers recommend the use of rubber linesman gloves if working around high-voltage circuits. Research service information and determine when these gloves are needed to be used.

- _____
- _____
- _____
- _____
- _____
- _____

____ 3. What are the safety precautions listed in service information? _____
