# Online Assignment

## Chapter 21
## Cooling System Operation and Diagnosis

### Question 3

(Online) find two articles and/or videos that explain the different types of radiators. (Below) list two different types of radiators. For each radiator type, list the construction material(s), design features, and the types or age of vehicle where they are commonly used. In terms of durability and performance, list the advantages and disadvantages of each type of radiator. Be prepared for in-class discussion. List references.
