**SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.**

1) The Fischer-Tropsch method can be used to change what into gaso

---

---

2) Why is it desirable to fill a compressed natural gas (CNG) vehicle with the highest pressure available?

---

---

3) Ethanol is also called by what other terms?

---

---

4) The majority of ethanol in the United States is made from what farm products?

---

---

5) How is a flexible fuel vehicle identified?

---

---

## Answer Key

Testname: SHORT 69

1) The Fischer-Tropsch method can use coal, natural gas, and other fossil fuel products to produce gasoline and diesel fuels.

Page Ref: 826

2) The higher the pressure is, the more gas can be installed in the pressurized tank and the larger the range of the vehicle

Page Ref: 826

3) Ethyl alcohol and grain alcohol are other terms that mean the same as ethanol.

Page Ref: 820

4) Ethanol is most commonly made from corn, grain, sorghum, wheat, barley, and potatoes.

Page Ref: 820
