Automotive Electr	ical and Engine	Performance,	8th Edition
Quiz 22A	_		

PLE CHOICE. Choose the one alternative that best completes the statement or answers the question 1) Which of these is a type of electric motor designed to rotate in small steps based on the signal from a vehicle computer? A) Stepper motor B) Compound motor C) Stepping motor D) Shunt control motor 2) Which of these electronic display devices uses electrodes and polarized fluid to create numbers and characters? A) LCD (Liquid Crystal Display) B) LED (Light Emitting Diode) C) VTF (Vacuum Tube Fluorescent) D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps D) Feedback problem from a short-to-voltage between headlights and dash display	on
from a vehicle computer? A) Stepper motor B) Compound motor C) Stepping motor D) Shunt control motor 2) Which of these electronic display devices uses electrodes and polarized fluid to create numbers and characters? A) LCD (Liquid Crystal Display) B) LED (Light Emitting Diode) C) VTF (Vacuum Tube Fluorescent) D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for LED dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
A) Stepper motor B) Compound motor C) Stepping motor D) Shunt control motor 2) Which of these electronic display devices uses electrodes and polarized fluid to create numbers and characters? A) LCD (Liquid Crystal Display) B) LED (Light Emitting Diode) C) VTF (Vacuum Tube Fluorescent) D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	1)
B) Compound motor C) Stepping motor D) Shunt control motor 2) Which of these electronic display devices uses electrodes and polarized fluid to create numbers and characters? A) LCD (Liquid Crystal Display) B) LED (Light Emitting Diode) C) VTF (Vacuum Tube Fluorescent) D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technicians A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
C) Stepping motor D) Shunt control motor 2) Which of these electronic display devices uses electrodes and polarized fluid to create numbers and characters? A) LCD (Liquid Crystal Display) B) LED (Light Emitting Diode) C) VTF (Vacuum Tube Fluorescent) D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technicians A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
D) Shunt control motor 2) Which of these electronic display devices uses electrodes and polarized fluid to create numbers and characters? A) LCD (Liquid Crystal Display) B) LED (Light Emitting Diode) C) VTF (Vacuum Tube Fluorescent) D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technicians A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
2) Which of these electronic display devices uses electrodes and polarized fluid to create numbers and characters? A) LCD (Liquid Crystal Display) B) LED (Light Emitting Diode) C) VTF (Vacuum Tube Fluorescent) D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technicians A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
and characters? A) LCD (Liquid Crystal Display) B) LED (Light Emitting Diode) C) VTF (Vacuum Tube Fluorescent) D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
A) LCD (Liquid Crystal Display) B) LED (Light Emitting Diode) C) VTF (Vacuum Tube Fluorescent) D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	2)
B) LED (Light Emitting Diode) C) VTF (Vacuum Tube Fluorescent) D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
C) VTF (Vacuum Tube Fluorescent) D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
D) CRT (Cathode Ray Tube) 3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
3) Technician A says that the data displayed on the dash can come from the powertrain control module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
module (PCM). Technician B says that the entire instrument panel assembly may have to be replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	3)
replaced even if just one unit fails. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	,
 A) Technician A only B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps 	
B) Technician B only C) Both technicians A and B D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash display B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
D) Neither technician A nor B 4) A backup camera system can may be integrated with the vehicle system	
 4) A backup camera system can may be integrated with the vehicle system	
 A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps 	
 A) reverse B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps 	4)
B) screen display C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	,
C) OnStar D) HUD 5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
5) A customer complains that every time the lights are turned on in the vehicle, the dash display dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
dims. Which of these is the MOST likely cause which of these conditions? A) Normal behavior for LED dash displays B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	5)
A) Normal behavior for LED dash displaysB) Normal behavior for VTF dash displayC) Poor ground in lighting circuit causing a voltage drop to dash lamps	υ,
B) Normal behavior for VTF dash display C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
C) Poor ground in lighting circuit causing a voltage drop to dash lamps	
6) A backup camera can show a poor-quality image on the interior display if what occurs?	6)
A) Ice or snow on the camera	0)
B) Bright lights aimed at the camera	
C) Extreme temperatures	
D) Any of the above	

7) How does changing tire diameter affect the speedometer reading?	7)
A) A smaller diameter tire causes the speedometer to read faster than the actual speed and	
more than the actual mileage on the odometer	
B) A smaller diameter tire causes the speedometer to read slower than the actual speed and	
less than the actual mileage on the odometer	
 C) A larger diameter tire causes the speedometer to read faster than actual speed and more than actual mileage on the odometer 	
D) A larger diameter tire causes the speedometer to read slower than the actual speed and more than the actual mileage on the odometer	
8) The General Motors rear park assist (RPA) system senses behind the vehicle.	8)
A) excessive heat	
B) darkness	
C) slippery areas	
D) objects	
9) The light indicating a problem with the ABS system is colored	9)
A) amber	
B) red	
C) green	
D) None of these	
10) Which of these is a supplemental display that projects the vehicle speed and sometimes other	10)
data, such as turn signal information, onto the windshield?	
A) Road Monitor	
B) Instrument Panel Display (IPD)	
C) Head-up display (HUD)	
D) Driver Information Center (DIC)	

Answer Key

Testname: AEEP8_22A

- 1) A
 - Page Ref: 337
- 2) A
- Page Ref: 340
- 3) C
 - Page Ref: 323, 332
- 4) B
 - Page Ref: 344
- 5) B
 - Page Ref: 339
- 6) D
- Page Ref: 345
- 7) A
 - Page Ref: 342
- 8) D
 - Page Ref: 345
- 9) A
 - Page Ref: 335
- 10) C
