5) What should the service technician include on the work order?		
	5) Wh	at should the service technician include on the work order?

Answer Key

Testname: ASSA8 SHORT1

- 1) Most owners' manuals contain all or most of the following information.
 - 1. Meaning of dash symbols
 - 2. How to reset the maintenance reminder light
 - 3. Specifications, including viscosity of oil needed and number of quarts (liters)
 - 4. Tire pressures and standard, as well as optional, tire sizes
 - 5. Maintenance schedule for all fluids, including coolant, brake fluid, automatic transmission fluid, and differential fluid
 - 6. How to program the remote control, as well as the power windows and door locks
 - 7. How to reset the tire pressure monitoring system (TPMS) after a tire rotation

Page Ref: 1

- 2) The most comprehensive and accurate service information is the service information from the vehicle manufacturer. Page Ref: 2
- 3) Name and address of the owner with contact information, such as the cell phone number and email address. Page Ref: 3
- 4) Although every vehicle manufacturer assigns various letters or numbers within these 17 characters, there are some constants, including: The first number or letter designates the country of origin. The model of the vehicle is commonly the fourth and/or fifth character. The eighth character is often the engine code. (Some engines cannot be determined by the VIN.) The tenth character represents the model year (MY) on all vehicles.

- 5) The technician should document the work order by stating not only what was done, but what service tools were used such as:
 - 1. Verified the customer concern of a rough running engine and the "check engine light" was on by visual inspection.
 - 2. Looked for stored diagnostic trouble codes using a factory scan tool and noted that a P0300 (random misfire detected) was set.
