

Name _____

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

- 1) Structural damage may be discovered by measuring _____. 1) _____
 - A) tire wear
 - B) frame diagonals
 - C) with a carpenter's level
 - D) toe-in

- 2) The proper order in which to perform a four-wheel alignment is _____. 2) _____
 - A) front camber, caster toe, rear camber, then rear toe
 - B) rear camber, front camber, caster, front toe, rear toe
 - C) rear camber and toe, front camber, caster, then front toe
 - D) front toe, camber, front caster, rear camber, then rear caster

- 3) On a vehicle with electronically controlled suspension or stability control, what extra step may be needed to complete an alignment? 3) _____
 - A) Reduce the tire pressure
 - B) Equalize the rear tie rods
 - C) Reset the steering angle sensor
 - D) Adjust the air bag system

- 4) Which angle is largest? 4) _____
 - A) 0.55 degrees
 - B) 1/4 degree
 - C) 45 minutes
 - D) 1/2 degree

- 5) Strut rods, if they are adjustable, can be used to adjust which angle? 5) _____
 - A) Toe
 - B) Camber
 - C) Caster
 - D) Toe-out on turns

- 6) Which alignment procedure may be done using self-calibration? 6) _____
 - A) Toe
 - B) Camber
 - C) Caster
 - D) Steering angle sensor (SAS)

- 7) Technician A says that, as wear occurs, camber usually becomes negative. Technician B says that, as steering linkage wear occurs, toe usually becomes toe-out from an original toe-in specification. Which technician is correct? 7) _____
 - A) Technician A only
 - B) Technician B only
 - C) Both technicians A and B
 - D) Neither technician A nor B

- 8) Which alignment angle is most likely to need correction? 8) _____
- A) Toe
 - B) Camber
 - C) Caster
 - D) SAI
- 9) What is the most common cause of memory steer? 9) _____
- A) Binding suspension components
 - B) Binding steering components
 - C) Both A and B
 - D) Neither A nor B
- 10) Technician A says that TOOT is the last adjustment made in a four wheel alignment. Technician B says that TOOT is a diagnostic angle that is not adjusted in a typical alignment. Which technician is correct? 10) _____
- A) Technician A only
 - B) Technician B only
 - C) Both technicians A and B
 - D) Neither technician A nor B
