---

---

---

## Answer Key

Testname: INTRO\_SHORT10

- 1) When using a blow gun, be sure that the air pressure is 30 psi or less at the gun and that only an OSHA approved air gun is used.  
Page Ref: 96
- 2) Some of the tools that use compressed air include an air impact wrench, die grinder, air ratchet, and air drill.  
Page Ref: 97-98
- 3) For maximum safety either a fluorescent or an LED trouble light should be used.  
Page Ref: 98-99
- 4) A vise can damage the surface of a part or a component unless protective jaws are used or other materials, such as a shop cloth, is used between the jaws and the component. Use caution not to over tighten an object.
