

Name _____

SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.

1) What lights can be used as daytime running lights?

2) Why is it important to avoid touching a halogen bulb with your fingers?

3) Why should the exact same trade number of bulb should be used as a replacement?

Answer Key

Testname: INTRO_SHORT25

- 1) Daytime running lights (DRLs) can use any of the following:
 1. High beam lights connected in series to produce a lower light output
 2. Parking lights
 3. Separate daytime running lights

Page Ref: 244
- 2) A halogen bulb contains a high-pressure gas, and oils from the hands can affect the expansion of the glass, which can shorten the life of the bulb.

Page Ref: 244
- 3) The same trade number bulb should be used as a replacement because this assures that the correct voltage and wattage bulb is used.
