

Name _____

SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.

1) Describe the labels used to identify flammables and explosive materials used by OSHA.

2) What is the correct disposal for used refrigerant oil?

3) List five common automotive chemicals or products that may be considered hazardous materials.

4) How should used engine oil be disposed?

Answer Key

Testname: MDA8_SHORT2

- 1) The label for flammables is a flame and the label for explosive materials is an exploding bomb.
Page Ref: 50
- 2) Air-conditioning refrigerant oil contains dissolved refrigerant and is therefore considered to be hazardous waste. This oil must be kept separated from other waste oil or the entire amount of oil must be treated as hazardous. Used refrigerant oil must be sent to a licensed hazardous waste disposal company for recycling or disposal.

- 3) Five common automotive chemicals or products include throttle body cleaner, brake cleaner, gear lube, used engine oil, and coolant.
Page Ref: 49
- 4) After collecting used oil in an appropriate container, such as a 55-gallon steel drum, the material must be disposed of in one of two ways.
 1. Shipped offsite for recycling
 2. Burned in an onsite or offsite EPA-approved heater for energy recoveryPage Ref: 43
