

Replace Thermostat

Meets ASE Ta	ask: Task A1 – D-8 – P-1			
Name:	Dat	e:	Time on Task:	
Make/Model/Year:		VIN:		
Evaluation (E	Enter number from 4, 3, 2, 1) :			
<u> </u>	Check service information and determine the recommended thermostat testing and replacement procedures.			
	CAUTION: Do not remove the pressure cap until the engine has cooled. The sudden drop in pressure that occurs when the cap is removed can cause the coolant to boil and cause serious burns from the escaping hot coolant.			
2.	Drain the cooling system into a suitable container, down to below the level of the thermostat.			
<u> </u>	Remove the thermostat housing bolts and housing.			
4.	What other components had to be removed to gain access to the thermostat housing?			
	Domovo the thermestat and discard the gaske	t Clean both gaske	t cooling curfocos
