

High Voltage Circuit Identification

Meets ASE Task: ASE Foundational Task #14

Name: _____ Date: _____ Time on Task: _____

Make/Model/Year: _____ VIN: _____

Evaluation (Enter number from 4, 3, 2, 1) : _____

1. Look for orange conduit and connections. This color indicates high voltage that could be fatal if touched. Describe the location of all orange-colored wires:

- a. _____
- b. _____
- c. _____
- d. _____

2. Most vehicle manufacturers recommend the use of rubber linesman gloves if working around high-voltage circuits. Research service information and determine when these gloves are needed to be used.

3. What are the safety precautions listed in service information?
