

Hybrid and Electric Vehicle Auxiliary Battery

Meets ASE Task: A6 – B-2 – P-1

Name: _____ Date: _____ Time on Task: _____

Make/Model/Year: _____ VIN: _____

Evaluation (Enter number from 4, 3, 2, 1) : _____

1. Check service information for the exact procedures to follow when testing and servicing the auxiliary (12 volt) battery used in a hybrid or electric vehicle. (describe):

2. What type of battery is used (from service information or from the decals on the battery)?

- ____ Flooded lead-acid battery
- ____ Absorbed glass mat (AGM) battery

3. What is the specified charging equipment or procedure?

4. **NOTE:** AGM batteries require special battery chargers that can supply a low amperage charging rate at a voltage level of less than a conventional battery charger.
