# Retrieve and Record Diagnostic Trouble Codes

Meets ASE Task: A7 – A-3 – P-1

Name:_____     Date:_____     Time on Task:_____

Make/Model/Year:_____     VIN:_____

Evaluation (Enter number from 4, 3, 2, 1) :_____

☐ 1.  Retrieve the DTCs using a scan tool. Fault codes may be found in the PCM or the HVAC control module.

  Specify which scan tool was used: _____

  _____   _____   _____   _____   _____   _____

☐ 2.  If no DTCs are displayed, set a DTC by disconnecting a sensor such as the refrigerant pressure sensor and then starting the engine and running the climate control system.

☐ 3.  Did the scan tool display both a generic OBD II (Poxxx) code *and* a manufacturer's specific DTC (P1xxx) code?        **Yes** _____     **No** _____

☐ 4.  Clear the stored DTCs using the scan tool.
