ACROSS

- 3** When current that lacks a good ground goes backward along the power side of the circuit in search of a return path to the battery, this reverse flow is called _____.
- 6** The _____ flasher is a device installed in a vehicle lighting system with the primary function of causing both the left and right turn signal lamps to flash when the hazard warning switch activated.
- 8** _____, also called stop lights, use the high-intensity filament of a double-filament bulb.
- 13** The _____ have an electronic flasher control circuit to operate the internal electromechanical relay.
- 16** The _____ is a visual effect where an image remains on the retina of the eye for a short time after the image has been removed.
- 19** The _____ is usually not noticeable unless one headlight arc tube assembly has been replaced due to a collision repair, and then

the difference in color may be noticeable.

- 20** A _____ changes the headlights from a high-intensity bulb to a low-intensity bulb or vice versa. Sometimes call a high/low switch.
- 22** _____ automatically turn on the headlights when the light sensor detects a low ambient light level.

DOWN

- 1** _____ are constructed using a replaceable bulb and a fixed lens cover that is part of the vehicle.
- 2** _____ is the transmission of light through special plastic that keeps the light rays parallel even if the plastic is tied in a knot.
- 4** The US _____ regulation requires that the driver be alerted when a turn signal bulb is not working.
- 5** _____ is a generic term primarily used for interior lights.
- 7** Another name for a variable resistor is a _____.

9 Another name for HID headlights are _____.

- 10** _____ color temperature equals 5,400 Kelvin.
- 11** _____ headlights produce a distinctive blue-white light that is crisper, cleaner, and brighter than light produced by a halogen headlight.
- 12** The trade number also identifies the size, shape, number of filaments, and amount of light produced, measured in _____.
- 14** _____ brake lights are frequently used for high-mounted stop lamps.
- 15** _____ temperature is Celsius temperature plus 273 degrees.
- 17** _____ reduce glare when driving in fog.
- 18** The number used on automotive bulbs is called the bulb _____, as recorded with the ANSI.
- 21** _____ primarily use a control module that turns on either the low or high-beam headlights or separate daytime running lights.
- 22** A system that mechanically moves the headlights to follow the direction of the front wheels is called _____.
