ACROSS

- 3 The _____ system uses 24 satellites in orbit around the earth to provide signals for navigation devices.
- 10 Speed sensors are commonly called _____.
- 13 Electronic _____ panels use the voltage changes from variable-resistance sensors, such as that of the fuel gauge, to determine fuel level.
- 14 The switch that operates the warning lamp is called a _____ switch.
- 15 A _____ dash display, which is similar to a television tube or LCD display, permits the display of hundreds of controls and diagnostic messages in one convenient location

DOWN

- 1 The pressure differential switch is usually the center portion of a multipurpose brake part called a _____.
- 2 The _____ display is a supplemental display that projects the vehicle speed and sometimes other data, such as turn signal information, onto the windshield.
- 4 All diodes emit some form of energy during operation;

the _____ diode is a semiconductor that is constructed to release energy in the form of light.

- 5 The vacuum _____ display is a popular automotive and household appliance display because it is very bright and can easily be viewed in strong sunlight.
- 6 The _____ uses cameras to detect if the vehicle is crossing over lane marking lines on the pavement.
- 7 A _____ is a type of electric motor that is designed to rotate in small steps based on the signal from a computer.
- 8 When a vehicle equipped with a digital dash is started, all segments of the electronic display are turned on at full brilliance for 1 or 2 seconds, this is commonly called the _____.
- 9 _____ displays can be arranged into a variety of forms, letters, numbers, and bar graph displays.
- 11 A _____ is used to display the area at the rear of the vehicle in a screen display on the dash when the gear selector is placed in reverse.
- 12 Cold cathode _____ lighting models are used by many vehicle manufacturers for backlighting.
