

Name \_\_\_\_\_

**MATCHING. Choose the item in column 2 that best matches each item in column 1.**

- |  |                                 |          |
|--|---------------------------------|----------|
| 1) Heats the cabin                       | A) 35°F-45°F                    | 1) _____ |
| 2) Normal low side pressure              | B) System restriction           | 2) _____ |
| 3) Both gauges too low                   | C) 25-35 PSI                    | 3) _____ |
| 4) Low gauge too low/high gauge too high | D) Thermostat                   | 4) _____ |
| 5) High gauge very high                  | E) Bleeder valve                | 5) _____ |
| 6) No heat                               | F) Engine coolant               | 6) _____ |
| 7) Helps remove air from coolant         | G) Low refrigerant              | 7) _____ |
| 8) Raises coolant temperature            | H) Condenser airflow restricted | 8) _____ |
|  | I) Low coolant                  |          |
|  | J) High coolant pressure        |          |

## Answer Key

Testname: MATCH 66

1) F

Page Ref: 789

2) C

Page Ref: 792

3) G

Page Ref: 793

4) B

Page Ref: 793

5) H

Page Ref: 794

6) I
