Name_____

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

 Technician A says that all metal-to-metal contact areas of the disc brake system should be lubricated with special brake grease for proper operation. Technician B says that the lubricate helps reduce brake noise (squeal). Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician 	1) ion
 2) A press-fit dust boot requires the use of to install it. A) a boot driver B) a set of rings C) a screwdriver D) compressed air 	2)
 3) A "chirping" noise is heard while the vehicle is moving forward, but stops when the brakes a applied. Technician A says that the noise is likely caused by the disc brake pad wear sensors. Technician B says the noise is likely a wheel bearing because the noise stops when the brakes applied. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician 	
 4) Technician A says that a loaded caliper includes an overhauled caliper assembly but no brake pads or hardware. Technician B says that a loaded caliper includes the pads and all needed hardware. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician 	e 4)
 5) What should be done after installing new disc brake pads? A) Pump the brake pedal several times B) Test drive the vehicle C) Replace the rotors D) Rotate the piston back into the caliper 	5)
 6) A vehicle pulls to one side when braking. This could be caused by all of these EXCEPT	6)

 7) Technician A says that brake pad thickness is the only check that needs to be performed. Technician B says that pads can wear unevenly. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician 	7)
 8) Technician A says that disc brake pads should be replaced when worn to minimal allowable thickness. Technician B says the pads should be removed and inspected whenever there is a brake performance complaint. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician 	8)
 9) Technician A says that disc brake pads should be replaced when worn to within 1/16 inch of the pad rivets. Technician B says the pads should be removed and inspected whenever there is a brake performance complaint. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician 	9)
10) The surface finish is critical on the outside surface of caliper pistons. A) True B) False	10)
