Name	

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question

- 1) Technician A says that the TP sensor signal voltage should be about 0.5 volt at idle and increase to about 2.5 volts at wide-open throttle (WOT). Technician B says A TP sensor can be tested using a DMM, DSO, or scan tool. Who is right?
 - A) Technician A only
 - B) Technician B only
 - C) Both technicians
 - D) Neither technician
- 2) A TP sensor is what type of sensor?

2) _____

1) _____

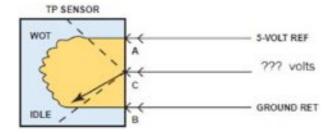

- A) Rheostat
- B) Voltage generating
- C) Potentiometer
- D) Piezoelectric
- 3) A P0122 DTC is retrieved using a scan tool. This DTC means _____.

3) _____

- A) the TP sensor voltage is low
- B) the TP sensor could be shorted-to-ground
- C) the TP sensor signal circuit could be shorted-to-ground
- D) all of the above are correct
- 4) After a TP sensor has been tested using the min/max function on a DMM, a reading of zero volts is displayed. What does this reading indicate?
- 1) _____

- A) The TP sensor is open at one point during the test.
- B) The TP sensor is shorted.
- C) The TP sensor signal is shorted to 5-volt reference.
- D) Both B and C are possible.
- 5) What voltage will be measured at terminal "C" as shown?

5) _____

- A) 4.5 volts
- B) 0.5 volts
- C) 12 volts
- D) Not enough information

6) The torque converter clutch will release when any movement of the TP sensor is detected. A) True	6)
B) False	
7) Most TP sensors have how many wires?	7)
A) 1	
B) 2	
C) 3	
D) 4	
8) Which wire on a typical TP sensor should be back-probed to check the voltage signal to the	8)
PCM?	
A) 5-volt reference (Vref)	
B) Signal wire	
C) Ground wire	
D) Meter should be connected between 5-volt reference and ground	
9) After a TP sensor has been tested using the min/max function on a DMM, a reading of 5 volts is	9)
displayed. What does this reading indicate?	
A) The TP sensor is open at one point during the test.	
B) The TP sensor is shorted.	
C) The TP sensor signal is shorted to 5-volt reference.	
D) Both B and C are possible.	
10) A is a variable–resistance sensor with three terminals.	10)
A) rheostat	
B) potentiometer	
C) thermistor	
D) thyristor
