Automotive Technology 6th Edition	
Chapter 8 - Fasteners and Thread Repair	
Quiz 8A	
Name	

1) Hardware store nongraded bolts are suitable for use on suspension components.  A) True  B) False  2) Metric thread pitch is measured in  A) millimeters B) centimeters C) inches D) none of these  3) A bolt that is threaded into a casting is often called a  A) stud B) cap screw C) block bolt D) crest bolt  4) The number of threads per inch is referred to as  A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician A only B) Technician B only C) Both technicians D) Neither technicians  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B D) Neither A nor B	MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the que	estion.	
A) True B) False  2) Metric thread pitch is measured in A) millimeters B) centimeters C) inches D) none of these  3) A bolt that is threaded into a casting is often called a A) stud B) cap screw C) block bolt D) crest bolt  4) The number of threads per inch is referred to as A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	1) Hardware store nongraded bolts are suitable for use on suspension components.	1)	
2) Metric thread pitch is measured in  A) millimeters B) centimeters C) inches D) none of these  3) A bolt that is threaded into a casting is often called a A) stud B) cap screw C) block bolt D) crest bolt  4) The number of threads per inch is referred to as A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician A only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B		· <del>-</del>	
A) millimeters B) centimeters C) inches D) none of these  3) A bolt that is threaded into a casting is often called a A) stud B) cap screw C) block bolt D) crest bolt  4) The number of threads per inch is referred to as A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B			
B) centimeters C) inches D) none of these  3) A bolt that is threaded into a casting is often called a A) stud B) cap screw C) block bolt D) crest bolt  4) The number of threads per inch is referred to as A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	2) Metric thread pitch is measured in	2)	
C) inches D) none of these  3) A bolt that is threaded into a casting is often called a A) stud B) cap screw C) block bolt D) crest bolt  4) The number of threads per inch is referred to as A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B			
D) none of these  3) A bolt that is threaded into a casting is often called a  A) stud B) cap screw C) block bolt D) crest bolt  4) The number of threads per inch is referred to as A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	B) centimeters		
3) A bolt that is threaded into a casting is often called a A) stud  B) cap screw C) block bolt D) crest bolt  4) The number of threads per inch is referred to as 4) A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B			
A) stud B) cap screw C) block bolt D) crest bolt  4) The number of threads per inch is referred to as A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	D) none of these		
B) cap screw C) block bolt D) crest bolt  4) The number of threads per inch is referred to as 4) A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its 6) A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	3) A bolt that is threaded into a casting is often called a	3)	
C) block bolt D) crest bolt  4) The number of threads per inch is referred to as A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	A) stud		
D) crest bolt  4) The number of threads per inch is referred to as A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	B) cap screw		
4) The number of threads per inch is referred to as  A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	C) block bolt		
A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	D) crest bolt		
A) pitch B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct? A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	4) The number of threads per inch is referred to as	4)	
B) gauge C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct?  A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its  A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B			
C) grade D) none of these  5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct?  A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its  A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B			
5) Technician A says that for best results, loosen the fastener immediately after spraying it with penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct?  A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	v v		
penetrating oil. Technician B says that rusted fasteners may be loosened by tapping with a hammer. Which technician is correct?  A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	D) none of these		
hammer. Which technician is correct?  A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its  A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	5) Technician A says that for best results, loosen the fastener immediately after spraying it with	5)	
A) Technician A only B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B			
B) Technician B only C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B			
C) Both technicians D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its  A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	•		
D) Neither technician  6) The grade of a fastener, such as a bolt, is a measure of its  A) tensile strength  B) hardness  C) finish  D) color  7) Which of these is used to cut threads in a drilled hole?  A) Tap  B) Die  C) Both A and B			
6) The grade of a fastener, such as a bolt, is a measure of its  A) tensile strength  B) hardness  C) finish  D) color  7) Which of these is used to cut threads in a drilled hole?  A) Tap  B) Die  C) Both A and B	·		
A) tensile strength B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	D) Neither technician		
B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	6) The grade of a fastener, such as a bolt, is a measure of its	6) _	
B) hardness C) finish D) color  7) Which of these is used to cut threads in a drilled hole? A) Tap B) Die C) Both A and B	A) tensile strength		
D) color  7) Which of these is used to cut threads in a drilled hole?  A) Tap  B) Die  C) Both A and B			
7) Which of these is used to cut threads in a drilled hole?  A) Tap  B) Die  C) Both A and B	C) finish		
A) Tap B) Die C) Both A and B	D) color		
A) Tap B) Die C) Both A and B	7) Which of these is used to cut threads in a drilled hole?	7)	
B) Die C) Both A and B	·	<i>'</i> —	
C) Both A and B			
, and the second			
	D) Neither A nor B		

8) Which of these is used to clean the threads in a casting?	8)
A) Thread chaser	
В) Тар	
C) Die	
D) None of these	
9) Damaged threads in an engine block can be repaired using which of these methods?	9)
A) A threaded insert	
B) A key lock insert	
C) Either A of B	
D) Neither A nor B	
10) Sheet metal screws are also known as	10)
A) self tapping screws	
B) machine screws	
C) hardened screws	

D) none of these

## Answer Key

## Testname: AT6\_8A

- 1) B Page Ref: 61
- 2) A Page Ref: 61
- 3) B Page Ref: 60
- 4) A Page Ref: 60
- 5) B Page Ref: 67
- 6) A Page Ref: 61
- 7) A Page Ref: 63
- 8) A Page Ref: 64
- 9) C Page Ref: 68
- 10) A Page Ref: 64
