

Name \_\_\_\_\_

**MATCHING. Choose the item in column 2 that best matches each item in column 1.**

- |                                   |                          |           |
|-----------------------------------|--------------------------|-----------|
| 1) ABS function                   | A) Brake switch          | 1) _____  |
| 2) Measures wheel rotational RPM  | B) Active WSS            | 2) _____  |
| 3) Controls hydraulic pressures   | C) System relay          | 3) _____  |
| 4) RWAL                           | D) Modulator             | 4) _____  |
| 5) An ABS output                  | E) Control module        | 5) _____  |
| 6) Required for stability systems | F) Prevents brake lockup | 6) _____  |
| 7) An ABS input                   | G) Wheel speed sensors   | 7) _____  |
| 8) Generates its own signal       | H) One channel ABS       | 8) _____  |
| 9) Requires electrical power      | I) Four channel ABS      | 9) _____  |
| 10) ABS solenoid location         | J) Solenoids             | 10) _____ |
|                                   | K) Diodes                |           |
|                                   | L) Passive WSS           |           |
|                                   | M) Prevents accidents    |           |
