

Name \_\_\_\_\_

**MATCHING. Choose the item in column 2 that best matches each item in column 1.**

- |                                       |                                  |           |
|---------------------------------------|----------------------------------|-----------|
| 1) Seals combustion chamber           | A) Full-floating pin             | 1) _____  |
| 2) Transfers force to crankshaft      | B) Oil control                   | 2) _____  |
| 3) Space between ring grooves         | C) Lands                         | 3) _____  |
| 4) Lower part of the piston           | D) Skirt                         | 4) _____  |
| 5) Attaches piston to connecting rod  | E) Powdered metal connecting rod | 5) _____  |
| 6) Retained with circlips             | F) Compression rings             | 6) _____  |
| 7) Have a fractured big end           | G) Connecting rod                | 7) _____  |
| 8) Measures ring end gap              | H) Piston                        | 8) _____  |
| 9) Measures piston diameter           | I) Micrometer                    | 9) _____  |
| 10) First piston ring to be installed | J) Wrist pin                     | 10) _____ |
|                                       | K) Feeler gauge                  |           |
