

Name \_\_\_\_\_

**MATCHING. Choose the item in column 2 that best matches each item in column 1.**

- |   |                        |           |
|---|------------------------|-----------|
| 1) Injects fuel into manifold           | A) 50 to 90 volts      | 1) _____  |
| 2) Injects fuel into combustion chamber | B) GDI                 | 2) _____  |
| 3) A piston pump                        | C) 30-60 PSI           | 3) _____  |
| 4) Richer near spark plug               | D) Stratified mode     | 4) _____  |
| 5) GDI injector voltage                 | E) 6 to 12 volts       | 5) _____  |
| 6) Mixture same throughout the cylinder | F) 500-2,900 PSI       | 6) _____  |
| 7) Replace if removed                   | G) High pressure pump  | 7) _____  |
| 8) Port injection pressure              | H) Homogeneous mode    | 8) _____  |
| 9) GDI fuel pressure                    | I) High pressure lines | 9) _____  |
| 10) Port injector voltage               | J) Port injection      | 10) _____ |
