ACROSS

- 8 _____ compound is one of the greases some manufacturers recommend using on caliper slide points.
- 9 _____ calipers are remanufactured calipers that include the correct replacement friction pads and all the necessary hardware.
- 13 Many original equipment brake pads use _____ layer shims on the back of the brake pads.
- 14 Do not test-drive the vehicle on public roads if the _____ warning light is on.
- 16 Some pistons are activated with _____-_____ threads.
- 17 _____-_____ is another name for burnished.
- 18 _____ _____ are another name for abutments.

DOWN

- 1 The places where the caliper contacts the caliper mount are called the _____.
- 2 _____ is a type of synthetic grease.
- 3 _____ grease are sometimes mixed with graphite, Teflon, and/or MOS2.
- 4 Another name for the abutments are the _____.
- 5 _____ grease is one of the greases some manufacturers recommend using on caliper slide points.
- 6 _____ fluid is similar to brake fluid but has antiwear additives.
- 7 _____ disulfide grease is often referred to as "moly" grease.
- 10 _____-_____ brake grease is one of the greases some manufacturers recommend using on caliper slide points.
- 11 _____ caliper pistons are made from a phenol-formaldehyde resin combined with various reinforcing fibers.
- 12 Some manufacturers recommend that their replacement brake pads be _____ before returning the vehicle to the owner.
- 15 _____ disc brake pad wear can be caused if the caliper is unable to "float"
