

Name: \_\_\_\_\_

Date: \_\_\_\_\_

1. A typical brass bushing is used in an automatic transmission for:

- A. Reducing friction between moving parts
- B. Sealing fluid passages
- C. Adjusting gear clearances
- D. Connecting electrical components

2. When installing a rebuilt or replacement transmission/transaxle, it is important to flush the automatic transmission fluid cooler to:

- A. Remove old ATF
- B. Ensure proper fluid flow
- C. Prevent contamination
- D. All of the above

3. Assembly lube should NOT be red in color because:

- A. It can be mistaken for an ATF leak
- B. It may cause chemical reactions
- C. It does not provide adequate lubrication
- D. It is not visible during inspection

4. The selective component in a clutch pack that can be changed to correct clearance issues could be:

- A. Reaction plate
- B. Pressure plate
- C. Thrust washer
- D. Any of these

5. Return spring inspection in a transmission is crucial because springs should be:

- A. Straight and provide proper pressure
- B. Colored coded according to location
- C. Replaced only when visibly damaged
- D. Tested with a spring tension gauge

6. During the reassembly of an automatic transmission/transaxle, the valve body must be:

- A. Lubricated with grease
- B. Assembled using the old fasteners
- C. Tightened to factory specifications
- D. Installed without gaskets

7. The purpose of air testing a clutch pack before installation is to:

- A. Clean the clutch pack
- B. Verify the correct assembly
- C. Check for proper seal and function
- D. Measure the air pressure resistance

8. An auxiliary transmission fluid cooler is recommended to:

- A. Increase ATF capacity
- B. Provide additional cooling
- C. Replace the factory cooler
- D. Warm the ATF in cold weather

9. When checking for proper clearance of all clutch packs, the technician should ensure it is:

- A. Below factory specifications
- B. Within factory specifications
- C. Above factory specifications
- D. Not necessary to check

10. The first step in verifying the need for unit repair is to consult:

- A. Service information
- B. The owner's manual
- C. The parts catalog
- D. Any of the above

Automotive Technology 7th Edition

Chapter 133

Multiple Choice Quiz B

Answer Key

1. A

2. D

3. A

4. D

5. A

6. C

7. C

8. B

9. B

10. A
